Contents

This feature derives from the power of [Pandoc](#) and is not a specific [Pankyll](#) feature. The **header identifiers feature** allows a user to create links to section inside the same document. The feature is described in detail in the [Pandoc](#) manual under [Headings and sections](#) with the [auto_identifiers](#) extension. Assuming there is a section `### MyTest`, then the author can easily create a link by:

```
[some text](#MyTest)
```
