<b>4</b>	<b>About This Document</b>	<b>2</b>
4.1	Changes	2

This document shows how to create an example [git](#) repository for a [Pankyll](#) theme with the example of the [Pankyll](#) [Newspaper] theme.

## 1 Creating the Simplicissimus Skeleton

```
cd pankyll-theme-simplicissimus-example
git init

# pandoc
git submodule add -b master https://github.com/ckuelker/pankyll-
pandoc pandoc
git submodule init

# content
export URL=https://github.com/ckuelker/pankyll-documentation
git submodule add -b master $URL content
git submodule init

# theme
```

```
mkdir themes
export URL=https://github.com/ckuelker/pankyl-theme-simplicissimus
git submodule add -b master $URL themes/pankyl-theme-simplicissimus
git submodule init
```

```
mkdir static
```

Some files need to be created:

- `cfg.yaml`
- `log.yaml`

The `Makefile` is optional.

## 2 Updating Git Sub-Modules

```
git submodule update --init --recursive
git submodule update --remote
# replace THEME with correct value
cd themes/pankyl-theme-THEME
git submodule update --init --recursive
git submodule update --remote
```
