Contents

1 Example Configuration 1

The **body include before** feature is provided by the theme [Rankle](#) for the page type `doc` and is set via the configuration in `cfg.yaml`. It will include text before the content, but after the menu on all pages of the type `doc`.

1 Example Configuration

Add this to the `site:` section of the configuration, for example in `cfg.yaml`:

```
site:
  body_include_before: INSERT THIS AFTER THE MENU BAR AND BEFORE THE
    ↪ CONTENT
```
